Whose Land, Whose Water? · adapted sheet

For SEGPA (Route S), CAP (Route C), CFA, bac pro (Route P) and lycée général (Route G). You can work alone.

Official page: https://itineraires-destinations.fr/whose-land-whose-water/dys/

Name: _____

How to do an exercise: 1. Read the text. 2. Read the worked example. 3. Do the exercise. 4. Check with the self-check on the page. 5. Say your answer aloud. 6. Keep the written record.

Lesson 1. What Can I See?

Goal: I can describe an image without guessing too much.

Read

Canada has First Nations, Inuit and Métis peoples.

These are different peoples.

Jim Logan’s painting shows a boy and a dog in a village.

Norval Morrisseau’s painting shows a loon, a fish and a sun.

Lines connect the elements.

We can describe the images.

We can also suggest meanings.

A suggestion is not a proven fact.

Building your vocabulary

• see: notice with your eyes;

• might: perhaps;

• line: a long thin mark;

• connect: join;

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

• alone: without another person.

Written record

I describe what I see. I use “might” for a possible meaning. I do not turn a guess into a fact.

Homework

Worked example:

Front: might.
Back: perhaps.

Make two cards: connect and alone.

Self-check: connect = join; alone = without another person.

Lesson 2. Equal Citizens and Existing Rights

Goal: I can explain why people rejected a proposal.

Read

In 1969, the Canadian government proposed the White Paper.

It wanted to remove Indian status.

It said this would bring equality.

Many First Nations leaders disagreed.

They wanted citizenship and existing rights.

In 1970, the Red Paper used the title Citizens Plus.

The White Paper was later withdrawn.

Building your vocabulary

• proposal: a plan for discussion;

• right: something people are entitled to;

• equality: equal worth or treatment;

• withdraw: take back;

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

• plus: something additional.

Written record

Many First Nations leaders wanted equal citizenship without losing existing rights. The Red Paper expressed this idea as “Citizens Plus”.

Homework

Worked example:

A proposal is a plan for discussion.

Write a definition of withdraw and one sentence with rights.

Self-check: withdraw means take back. Example: “The leaders wanted to keep their rights.”

Lesson 3. A Dam Changes a Place

Goal: I can name a benefit and a loss.

Read

A dam holds back river water.

A reservoir stores the water.

The James Bay project produced electricity.

It also changed land and community life.

The 1975 agreement brought compensation and institutions.

Some places and activities were lost or changed.

People can recognise a benefit and still explain a loss.

Building your vocabulary

• dam: a structure holding back water;

• reservoir: an artificial lake;

• benefit: something helpful;

• loss: something no longer available;

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

• agreement: a decision accepted by parties.

Written record

A development project can bring benefits and losses. I identify both and say whose view I am reporting.

Homework

Worked example:

Benefit: electricity. Loss: changed hunting grounds.

Write one benefit and one loss from this lesson.

Self-check: use examples supported by the text.

Lesson 4. Listening to Campaigners

Goal: I can say who is speaking and what they want.

Read

Muskrat Falls and Site C are different dam projects.

At Muskrat Falls, Billy Gauthier protested in 2016.

He wanted to protect water and traditional activities.

At Site C, Roland Willson criticised the project.

He proposed other energy choices.

A prediction says what may happen.

A measurement reports what was observed.

Building your vocabulary

• protect: keep safe;

• protest: publicly show disagreement;

• alternative: another choice;

• prediction: what someone thinks may happen;

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

• measurement: an observed amount or result.

Written record

I identify the speaker and the concern. A prediction is not the same as a measured result.

Homework

Worked example:

Prediction: levels could rise.

Write one prediction and one measurement sentence.

Self-check:

Prediction: pollution might increase.
Measurement: the test recorded a higher level.

These are language examples, not claims about a specific new test.

Lesson 5. Different Views of a Pipeline

Goal: I can explain that people may disagree.

Read

A pipeline carries oil or gas.

Some leaders support a project.

They may expect jobs or income.

Other leaders oppose it.

They may stress territory, water or decision-making.

Consultation means meaningful discussion.

Consent means agreement.

They are not the same word.

One agreement does not prove that everyone agrees.

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

Building your vocabulary

• pipeline: a long pipe carrying oil or gas;

• income: money received;

• concern: something that causes worry;

• consent: agreement;

• stake: an ownership share.

Written record

People within a community may disagree. I identify who supports a claim. Consultation and consent are different concepts.

Homework

Worked example:

Argument: jobs. Question: how many jobs, and for whom?

Write one argument and one question about evidence.

Self-check: the question should help test the argument.

Lesson 6. Checking a Promise

Goal: I can read a dated count without changing what it measures.

Read

In 2015, the government promised to end certain long-term drinking-water advisories.

The deadline was March 2021.

The official page retrieved for this lesson shows a snapshot dated 10 September 2026.

It lists:

• 158 advisories lifted since November 2015;

• 38 advisories still active;

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

• 36 communities with active advisories.

These numbers concern public systems on reserves.

An advisory is not a person.

An advisory is not a community.

Building your vocabulary

• deadline: the date for completing an action;

• active: still in effect;

• lifted: officially ended;

• source: where information comes from;

• snapshot: information for a stated date.

Written record

> I give a source and date with a figure. I check what the number counts. Progress does not always mean completion.

Homework

Worked example:

> Figure: 38. Meaning: active advisories. Date: 10 September 2026. Source: Indigenous Services Canada.

Complete the same four fields for 158.

Then watch the whole film The Grizzlies at home before lesson 7. It is homework. Lesson 7 tells you how.

Self-check: 158 advisories lifted since November 2015; snapshot dated 10 September 2026; Indigenous Services Canada.

Lesson 7. Young People and Hope

Goal: I can say who speaks in the film and what the trailer shows.

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

Read

The Grizzlies is a Canadian film.

It is based on a true story.

It concerns young people and a lacrosse team in Kugluktuk.

You watch the whole film at home before this lesson.

Today you watch the trailer and listen to an interview.

A trailer is short. It shows only some moments.

Say where your idea comes from: the film, the trailer or the interview.

Building your vocabulary

• team: people working or playing together;

• hope: a feeling that something good is possible;

• give up: stop trying;

• support: help;

• synopsis: a short account of a story;

• trailer: a short video with some moments from a film.

Written record

> I watched the film at home. A trailer shows only some moments. I say where my idea comes from: the film, the trailer or the interview.

Homework

Worked example:

> One voice: a student tells the teacher, “This is not about you.” This shows that the young people act for themselves.

Write one voice from the film: who speaks, what they say and what it shows.

Self-check: say who speaks, what they say and what it shows.

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

Lesson 8. My Evidence and My Request

Goal: I can explain an issue and make a supported request.

Read

A good public message explains its subject.

It gives facts.

It names sources.

It does not claim more than the evidence shows.

It ends with a clear request.

You do not need a group to complete this task.

Building your vocabulary

• claim: a statement someone makes;

• evidence: information supporting a claim;

• request: something you ask someone to do;

• source: where information comes from;

• limitation: what the evidence does not establish.

Written record

My strongest fact is _____.
Its source is _____.
One limit is _____.
My request is _____.

Homework

Worked example:

First version: “Everyone agreed.”
Improved version: “Some representatives signed agreements.”

Find one sentence in your own message that needs greater precision.

Write:

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

First version: _____.

Improved version: _____.

Self-check: the improved sentence should be clearer, better supported or less absolute.

Independent progress record

Complete this after each lesson.

Lesson	I completed the reading	I attempted listening or labelled the support route	I spoke aloud	I checked answers	My next step
1	Yes / Not yet	Not required	Yes / Not yet	Yes / Not yet	
2	Yes / Not yet	Yes / Not yet	Yes / Not yet	Yes / Not yet	
3	Yes / Not yet	Yes / Not yet	Yes / Not yet	Yes / Not yet	
4	Yes / Not yet	Yes / Not yet	Yes / Not yet	Yes / Not yet	
5	Yes / Not yet	Yes / Not yet	Yes / Not yet	Yes / Not yet	
6	Yes / Not yet	Yes / Not yet	Yes / Not yet	Yes / Not yet	
7	Yes / Not yet	Yes / Not yet	Yes / Not yet	Yes / Not yet	
8	Yes / Not yet	Not required	Yes / Not yet	Yes / Not yet	

The same cultural enquiry remains available across the routes. What changes is the amount of language, the degree of support and the expected independence, not the students' entitlement to accurate information, meaningful participation and accessible learning.
