

TEACHER SHEET · The Grizzlies · The Sentence I Cannot Finish Alone

Lesson 7 · Sequence: Whose Land, Whose Water? · The Grizzlies, 2018, directed by Miranda de Pencier · 52 minutes timed, 55 minutes in total

Spiral method devised by Madame Carole Paoli Pompougnac.

◆ Classes and levels

Class	Target and route
Première générale, LVA	B1+ · extended route
Première générale, LVB	B1 · extended route, supported if needed
Bac pro	BO spécial 11 April 2019 · supported, then extended
CFA apprentices	the route of their qualification · dys Route P
CAP	supported route first · dys Route C
SEGPA	dys Route S

- Axes: Diversité et inclusion · Art et pouvoir · Les aires anglophones américaines
- Also L'être humain et la nature, if students pick evidence about place or land

► What students do in this lesson

- Start from their own reaction and end with a claim they can defend.
- Explain one film choice: framing, sound, editing or point of view.
- Listen to a classmate's detail and adjust their reading.
- Say whose view it is. Nobody speaks for Inuit people.

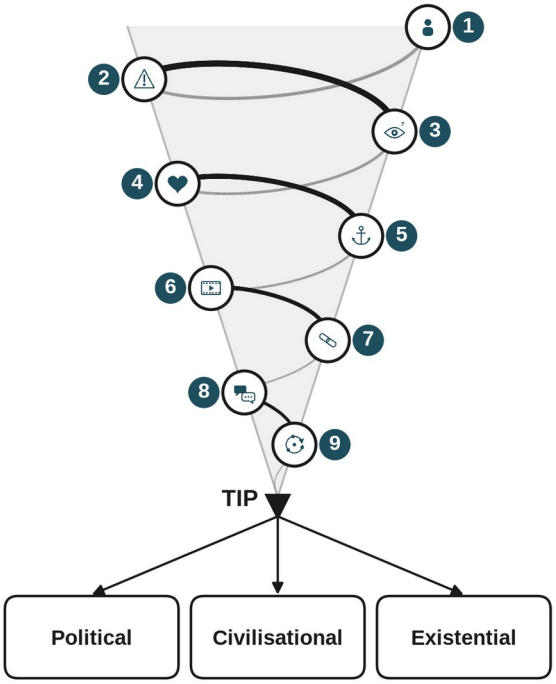

By the end, each student has:

- ✓ a written record
- ✓ spoken in each debate round
- ✓ homework: a recorded conclusion (about 30 s, or 45 to 60 s on the extended route)
- ✓ two flashcards

Debate motion:

- In *The Grizzlies*, following the newcomer helps us enter the story, but can also limit whose agency we notice.

▼ The spiral of questions: a thinking tool

Spiral method devised by Madame Carole Paoli Pompougnac.

- A way to organise your thinking: from a general question to a real problem.
- Use it at the start of the study. Students begin with wide, personal questions, then look at the film's choices, then reach the tip.
- At the tip they choose one of three problems: political, civilisational or existential.
- They can reuse it later with other films or texts.
- The full spiral, with a question and an answer frame at each station, is in the student document. The table below gives the same nine stations.

Turn	Type of question	Example
Turn 1 · stages 1 to 4	general, personal	"Who would you be?"
Turn 2 · stages 5 to 6	evidence, the film's choices	"How does the film show it?"
Turn 3 · stages 7 to 8	testing, another viewpoint	"What if the film showed it differently?"
Tip · stage 9	the problem	"Whose voice and agency count?"

Station	Question	Expected answer	Reasoning	Language
1	Who would you be?	I would be… because…	personal reaction: choosing a way in	I would be + because

Station	Question	Expected answer	Reasoning	Language
2	What shocks you?	The moment when… shocks me.	personal reaction	emotion adjectives: unsettled, uncomfortable, disturbed
3	What surprises you?	I expected…, but…	personal reaction: expectation and what I saw	I expected… / but…
4	What do you like?	I like the way…	personal reaction with a reason	I like the way… / I value… because…
5	What exactly gave you that response?	We see… / We hear…	observation	we see / we hear
6	How does the film show it?	The camera shows…, so I notice…	film-language analysis	the camera + verb: shows, frames, follows; so
7	What if the film showed it differently?	If the film showed…, I might…	testing the evidence	if + past simple, might + base verb
8	What did another spectator notice?	Another detail is…	testing the evidence against another viewpoint	another detail is…; supports, complicates, changes
9	What can you argue? What can you not claim?	I can argue…, but I cannot claim…	qualified argument	although / I can argue / I cannot claim

What to prepare

Item	How many	When
Short preparation sheet (entry-position words, the four reaction frames, the neutral model)	1 per student	the lesson before home viewing
Student document with the speaking circuit (one A4 sheet)	1 per student	lesson 7
Two small pieces of paper: their own evidence and their partner's detail	2 per student	lesson 7, minutes 9 to 38
Tick grids 1 and 2 (student document, stages 5 and 8)	1 per student	minutes 9 to 16 and 26 to 38
Picture prompts: framing, sound, editing, point of view	1 set per group of four	minutes 9 to 21
Building your vocabulary page and the exercises with answers	1 per student	minutes 21 to 26
Self-correction grid	1 per student	minutes 44 to 49 and homework
Blank flashcards	2 per student	minutes 49 to 52
Dys version, printed separately, 14 pt	as needed	lesson 7 or after an absence
A timer for the three four-minute rounds	1	minutes 26 to 38

▲ Before the film: watch it yourself first. Warn students about the suicide theme and emotionally charged scenes. Offer the invented scene as an alternative, with no penalty. Check that every student can watch it legally, and follow your school's safeguarding arrangements.

▲ At home: about 8 minutes of preparation before watching, 10 to 15 minutes after. Nothing to write during the film.

9 The 9 stages at a glance

#	Stage	When	What you do	What you can say
1	Find your entry position	after viewing · again at min 4 to 9	offer the five positions, ask for one limit	"What would that position not allow you to know?"
2	Register shock	min 4 to 9	accept one word; steer students away from judging a whole community	"Which moment? The moment when… makes me…"
3	Register surprise	min 4 to 9	keep surprise apart from shock	"What did you expect? What did you see?"
4	Register liking	min 4 to 9	ask for something precise and a reason	"I value… because…"
5	Anchor a reaction	min 9 to 16	check that the detail can be seen or heard: label O	"What exactly in the film gave you that response?"
6	Find the film choice	min 9 to 16	model one tool: label I	"How does the film make this detail available to you?"
7	Test the connection	min 16 to 21	give one thing to improve: label P	"Would your reaction change if the film presented the same event differently?"
8	Another spectator's detail	min 26 to 38, round 2	keep time; ask for a detail, not a feeling	"Does it support, complicate or change your reading?"
9	Close the circuit	min 26 to 44, round 3	ask for a claim and a limit	"Remove your detail. Does your argument change?"

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

◷ The 52-minute lesson

Minutes	Step	What happens
0 to 4	Diagnostic re-entry	students point to a reaction, say it, complete “The moment when… makes me…”
4 to 9	Rebuild the personal route	in pairs: entry, shock, surprise, liking; each picks one response
9 to 16	Anchor and explain	evidence piece, one film tool, “The film…, so I…”; tick grid 1
16 to 21	Midpoint check	O and I kept apart, one change of presentation tested, one thing to improve
21 to 26	Language repair	core exercises, answers checked, one sentence improved
26 to 38	Scaffolded debate	three four-minute rounds in groups of four, everyone speaks; tick grid 2
38 to 41	Collective judgement	one careful sentence per group, one disagreement left open
41 to 44	Individual assessed conclusion	recorded or written
44	▲ STOPPING POINT	everyone has spoken, linked a reaction to evidence and reached a conclusion
44 to 49	Written record and self-correction	one weakness found, one corrected version
49 to 52	Homework and flashcards	two cards, one said aloud
Exit 44 to 52	Eight-minute emergency exit	44 to 46 conclusion and limit · 46 to 49 written record · 49 to 51 homework and one card · 51 to 52 correct one sentence

✎ Key vocabulary

Theme	Analysis	Grammar
newcomer · agency · initiative	foregrounds · withholds information	because · but · so
mutual support · take over	directs my attention towards	If + past simple, might + base verb
make room for · belonging	complicates my interpretation · qualifies my claim	Although…, …
unsettled · unexpected · attentive	framing · sound · editing · point of view	I can therefore argue…, but I cannot claim…

◐ Differentiation

Supported route · A1/A2	Extended route · B1/B1+	Dys version
point first, then say one word	choose a more precise word	works on its own, 14 pages, Arial 14 pt
frames: “We see…”, “The film…, so…”	“If the film…, I might…”, “Although…”	one instruction per line, a worked example first
join two clauses given by you	build an explanation and add a limit	answers to check on the page
homework: about 30 seconds	homework: 45 to 60 seconds	Routes S (SEGPA), C (CAP), P (bac pro, CFA), G (lycée général)
notes and frames allowed	a competing reading, a link to the motion	a ready-made challenge after an absence

▲ Cultural care

- Students enter a situation. They never take on someone’s identity.
- They say “The film portrays [name] doing…”, never “I am [name].”
- Shock is about a moment or an action, never a whole community.
- Nobody has to share anything personal. “Nothing shocks me” is a fine answer.
- Never ask a student to put themselves in the place of someone in a suicidal crisis.
- One film does not represent every Inuit experience.

✓ Assessment

- Diagnostic at minutes 0 to 4, midpoint at 16 to 21, summative out of 20 (five criteria marked 0 to 4, language included). Grids in section 12. A filled-in example is in the correction sheet.

◎ Homework

► 1. Use the self-correction grid. 2. Improve the conclusion. 3. Record it with notes.

► 4. Reuse one film term and one reasoning structure. 5. State one limit. 6. Revise two flashcards.

CORRECTION SHEET · The Grizzlies · The Sentence I Cannot Finish Alone

For colleagues: the answers to expect and how to help students back on track · Examples come from the invented scene, The Community Repair Table

◎ How to read the spiral

Turn	Stages	The student moves from…	… to
Turn 1. Personal entry	1 to 4	one word: a position, shock, surprise, liking	a short located sentence
Turn 2. Anchoring	5 to 6	a reaction	an observed detail (O) and a film choice (I)
Turn 3. Testing	7 to 8	one reading	a tested reading (P) and another spectator's detail
Tip of the spiral	9	a tested reading	a defensible claim with a limit, linked to one problem

- Everyone does the same thinking. Only the amount of language help changes.
- Mark the reasoning, not how strongly a student feels or whether they agree with you.
- If a student succeeds with full support, note it as supported work, not as independent B1.

Spiral method devised by Madame Carole Paoli Pompougnac.

1 Stage 1. Find your entry position — Turn 1. Personal entry

Supported answer · A1/A2	"A witness." "I choose the newcomer's position."
Extended answer · B1/B1+	"I choose an invented witness because I want to notice who speaks. This position gives access to the exchange, but not to anyone's private thoughts."
✓ Accept	any of the five positions · a gesture, then one word · a changed choice after viewing
✗ Common error	"I am [name]. I know how Inuit young people feel."
► Redirect with	"Which position could help you enter the situation, and what would that position not allow you to know?"
✎ Model sentence	"The film portrays [name] doing… . That makes me reconsider…"

2 Stage 2. Arrive: register shock — Turn 1. Personal entry

Supported answer · A1/A2	"Uncomfortable." "This makes me uncomfortable."
Extended answer · B1/B1+	"This action unsettles me because…, but my reaction does not explain how everyone in the scene feels."
✓ Accept	"Nothing shocks me." · "I prefer 'unsettles'." · declining to discuss a reaction
✗ Common error	"This community is shocking." · "Their culture is strange."
► Redirect with	"Which moment or action? Start with: The moment when… unsettles me."
✎ Model sentence	"Leah's sharp 'Wait' unsettles me." (invented scene)

3 Stage 3. Notice surprise — Turn 1. Personal entry

Supported answer · A1/A2	"Different." "I expected Alex to repair the bridge. The teenagers already have a plan."
Extended answer · B1/B1+	"I expected…, but the film shows… . My expectation may reveal more about my assumptions than about the people represented."
✓ Accept	"I did not expect the film to draw my attention to…" · no clear expectation
✗ Common error	surprise confused with shock · surprise as a judgement of people: "I am surprised they can do it."
► Redirect with	"Surprise means different from what you expected. What did you expect? What did you see?"
✎ Model sentence	"The wider shot surprises me because it reveals preparation I had not seen."

4 Stage 4. Choose something you value — Turn 1. Personal entry

Supported answer · A1/A2	"Listening." "I like this moment of listening."
Extended answer · B1/B1+	"I value Alex putting down the glue because Alex becomes useful without taking over."
✓ Accept	an action, exchange, relationship, sound or way of showing a place · not liking everything
✗ Common error	"I like the film, it is good." · turning difficult circumstances into something positive
► Redirect with	"Choose one moment, sound or action. Then add: because…"
✎ Model sentence	"I value the way the film presents mutual support, although the situation remains difficult."

5 Stage 5. Choose one reaction and anchor it — Turn 2. Anchoring

Supported answer · A1/A2	"We see Alex reaching for glue." "We hear 'Wait'."
Extended answer · B1/B1+	"Leah says 'Wait' before the wider shot reveals the replacement piece."
✓ Accept	any detail another spectator could check: seen, heard, said or done · label O
✗ Common error	an assumed feeling: "Everyone feels rejected." · a verdict: "Leah is rude."
► Redirect with	"What do we actually see or hear? Could another spectator check it?"
✎ Model sentence	"The character leaves before the exchange ends."

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

6 Stage 6. Find the film's part in your reaction — Turn 2. Anchoring

Supported answer · A1/A2	"The film shows Alex first. So I notice Alex's response."
Extended answer · B1/B1+	"Framing and editing initially organise my attention around Alex's offer. The wider shot then gives me information that makes Leah's interruption seem practical rather than simply hostile."
✓ Accept	one tool named with its effect on attention · label I
✗ Common error	"The camera is good." · plot summary · "The camera proves Leah is angry."
► Redirect with	"Which tool: framing, sound, editing or point of view? What does it make you notice first?"
✎ Model sentence	"The wider shot reveals preparation I had not seen."

7 Stage 7. Test the connection — Turn 3. Testing

Supported answer · A1/A2	"Show the whole table first. I might understand 'Wait' sooner."
Extended answer · B1/B1+	"If the film showed the wider shot first, I might hear 'Wait' as a useful instruction rather than an unfriendly interruption."
✓ Accept	a change of presentation only: setting, order, music, pause, timing · label P
✗ Common error	changing the event: "If Leah did not speak…" · "If the film will show more, I might understand."
► Redirect with	"Keep the event. Change only how the film shows it." · If + past simple, might + base verb
✎ Model sentence	"If the film showed more, I might understand differently."

8 Stage 8. Let another spectator contribute — Turn 3. Testing

Supported answer · A1/A2	"Another detail is: Alex still helps at the end." "Complicates."
Extended answer · B1/B1+	"Your detail complicates my reading because the scene does not reject help. It changes who directs the help."
✓ Accept	supports, complicates or changes · a "?" label for an uncheckable detail · the supplied challenge after an absence
✗ Common error	the partner gives a feeling: "You should feel sad." · the detail is ignored · overcorrection: "The adult should do nothing."
► Redirect with	"Give a detail, not a feeling." · "Does it support, complicate or change your reading? Why?"
✎ Model sentence	"This complicates my reading because listening does not mean doing nothing."

9 Stage 9. Close the circuit — Tip of the spiral

Supported answer · A1/A2	"At first, 'Wait' seemed unfriendly. The film shows Alex's offer before the teenagers' plan. So I understand the interruption only later. Alex still helps at the end. I think the scene values listening, but I cannot claim to know Leah's private feelings."
Extended answer · B1/B1+	"At first, I interpreted Leah's 'Wait' as unfriendly. That reaction partly came from the order of information. If the wider shot came first, I might understand the interruption differently. I read the scene as valuing responsive help, although it does not establish Leah's private feelings."
✓ Accept	a claim with a limit · read notes and frames · disagreement that remains
✗ Common error	the argument does not change when the detail is removed · "The film shows hope." · speaking for a community
► Redirect with	"Remove your detail. Does your argument change? If not, reconnect it to the film."
✎ Model sentence	"This is my response to a representation. It is not the experience of the people represented."

▲ Tip of the spiral: three model paths from the general question to the problem

These are model paths for you. Students build their own, with details they really saw in the film.

Political problem — who has a voice

▼ General question	Whose land, whose water: who decides, and whose voice is heard?
▼ Narrower question	In *The Grizzlies*, whose initiatives does the film let me notice, and in what order?
▼ Evidence to look for	who speaks first, who is framed when decisions about the team are made, whose action the editing delays (student's own checked detail)
Problem	Does following the newcomer limit whose agency we notice?
Supported claim	"The film shows the newcomer first, so I notice him. But the young people also act. I cannot claim to know how the community decides."
Extended claim	"Following the newcomer helps me enter the story, although it can delay my attention to the young people's own initiatives. I can argue this about the film's construction, but I cannot claim it describes how the community governs itself."

Civilisational problem — who tells the story

▼ General question	How are communities represented to audiences who do not belong to them?
▼ Narrower question	Does the film repeat or resist the story of an outsider saving a community?
▼ Evidence to look for	whose point of view organises a key scene, what the framing includes or leaves out, which moments focus on the team rather than the newcomer
Problem	Can a story entered through a newcomer avoid turning someone else's story into the newcomer's story?
Supported claim	"At first, I follow the teacher. Later, the film shows the team's choices. I think the film is not only his story, but one film does not represent every Inuit experience."
Extended claim	"Although the newcomer guides my first response, later choices redistribute my attention towards the team. I can therefore argue that the film complicates the outsider story, but I cannot claim to speak for Inuit people about how they are represented."

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

Existential problem belonging and loss	
▼ General question	What helps young people find belonging when life is hard?
▼ Narrower question	How does the film present belonging within the team without turning hardship into a simple lesson?
▼ Evidence to look for	moments of listening, mutual support, silence or a pause (no personal disclosure; distressing passages may be skipped)
Problem	Can a spectator respond personally to belonging and loss without claiming another person's experience?
Supported claim	"I value the moments of support because people listen. My reaction is mine. The experience in the film is not mine."
Extended claim	"I value the way the film makes room for mutual support, although it does not turn difficult circumstances into something simply positive. My reaction belongs to me; the experience represented does not become mine."

✓ Tick grid 1: what does each moment do? (stage 5)

✓ expected answer · (✓) possible answer: reactions are personal, so several answers are possible. Accept another tick if the student can say why.

	My reaction			The film's tool			
Moment (practice scene)	shock	surprise	like	framing	sound	editing	point of view
The opening shot shows Alex's face.				✓			(✓)
Leah says sharply "Wait."	(✓)				✓		
A piece falls. We hear the impact. There is no music.	(✓)				✓		
A wider shot reveals Leah holding a replacement piece.		(✓)		✓		✓	
Alex puts down the glue.			(✓)				
We see the teenagers' plan only after Alex's offer.		(✓)				✓	✓
The final shot stays on the teenagers. Alex's hands remain at the edge.			(✓)	✓			

- Film tools: most rows have one or two clear answers. Reactions: there is no single right tick.
- Last row (their own moment from *The Grizzlies*): check that the moment is something we can see or hear.

✓ Tick grid 2: whose idea is it? (stage 8)

Idea	The newcomer teacher	The young players	The community, as the film shows it	The film-maker's choices	Another spectator	Me
Arrives with incomplete knowledge.	✓					
Takes the initiative and makes choices.	(✓)	✓				
Was there before the newcomer arrived.		✓	✓			
Shows the newcomer first.				✓		
Lets us hear something before we see it.				✓		
Gives me a detail I had missed.					✓	
"This moment unsettles me."						✓
"I expected confidence to mean knowledge."						✓

- Rows 7 and 8: only "Me". A feeling belongs to the student; nobody ticks the community for it.
- Row 2: if a student also ticks the newcomer, accept it, then ask whose initiatives the film lets us see.
- Row 3: the young players belong to the community, so both ticks are right.
- Dys version: the simpler grids have their answers on the same page.

✓ All exercise answer keys

Exercise	Answers

Core 1. Match	1b, 2c, 3d, 4a.
Core 2. Join	1. I expected an immediate repair, but the group already had a plan. 2. The wider shot comes later, so I notice the preparation later. 3. I change my reading because another detail complicates it.
Core 3. Complete one level above	A: “We see Alex first. So I notice Alex’s response.” B: “The film shows Alex first, so I notice the offer, but the wider shot reveals another plan.” C: “If the film showed the whole table first, I might notice the teenagers’ preparation sooner. That would not establish their private feelings.”
Further 4. Replace an assumed feeling	“The film shows one person leaving. That does not establish everyone’s feelings.”
Further 5. Transform	1. If the film showed the group first, my attention might change. 2. Although the newcomer is central, other people also act.
Further 6. Label	1. O; 2. I; 3. P.
Further 7. Oral reuse	“At first, I feel uncomfortable. The editing delays the wider shot, so I do not yet see the preparation.”
Further 8. Short written analysis	“The interruption initially unsettles me. We hear ‘Wait’ before the wider shot. The editing delays information that changes my reading. I cannot claim to know the speaker’s private feelings.”
Dys A. Match	1b, 2c, 3a.
Dys B. Add a connector	1. so; 2. because; 3. but.
Dys C. Complete the conditional	1. showed; 2. might.
Dys D. Repair a claim	“I can interpret the portrayal, but I cannot claim the character’s private experience.”
Dys tasks 1 to 7: possible answers	1. “I choose an invented witness. I cannot know private thoughts.” 3. “I expected Alex to use the glue, but Alex puts it down.” 5. Alex reaches for glue. · Leah says “Wait.” · The wider shot shows a replacement piece. 6. “The film delays the wider shot, so I see the teenagers’ preparation later.” 7. “If the film showed the whole table first, I might notice the teenagers’ plan sooner.”

◆ Filled-in example: teacher summative grid, 20 marks (example only, invented student)

Criterion	Mark	Evidence heard or read	Next step
Personal response developed into reasoning	3/4	“At first, ‘Wait’ seemed unfriendly” becomes a reasoned claim about listening.	Add a second reason.
Evidence and film analysis	3/4	accurate detail, editing named with a clear effect; conditional test not developed	Develop the “If the film…” test.
Cultural care	4/4	“I cannot claim to know Leah’s private feelings.”	Keep the limit.
Listening and revision	2/4	acknowledges the partner’s detail: “Complicates.”, no consequence explained	Use “It complicates my reading because…”
Language	3/4	because, but, so controlled; “If the film will show…” once	If + past simple, might + base verb.
Total	15/20	supported frames used for the conclusion	recorded as scaffolded performance

✎ Filled-in example: student self-correction grid (example only)

Criterion	My first version	What I missed	My improved version
Response to another detail	“Complicates.”	the consequence	“Your detail complicates my reading because the scene does not reject help.”
Language	“If the film will show more, I might understand.”	past simple after If	“If the film showed more, I might understand differently.”
Evidence and form	“The camera is good.”	a precise choice and its effect	“The wider shot reveals preparation I had not seen.”

The Sentence I Cannot Finish Alone

Spiral method devised by Madame Carole Paoli Pompougnac.

The Grizzlies · Lesson 7. The Grizzlies: From My Reaction to My Argument · Sequence: Whose Land, Whose Water?

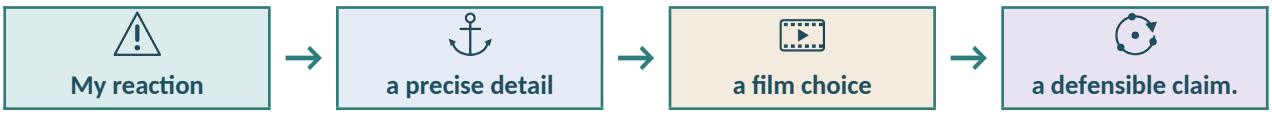

◆ GUIDING PRINCIPLE

"Watching the film, the student remains a spectator; but talking about it must involve the student in an almost personal way."

The 9-stage route at a glance

The speaking circuit

Contents: teacher sheet · correction sheet · 1 to 5 teacher framework · 6 student document, stage by stage · 7 visual supports · 8 worked example · 9 the 52-minute lesson · 10 vocabulary · 11 practice and answers · 12 assessment · 13 dys version

1. Classic methods deliberately avoided

This design does not use:

✗ a viewing questionnaire;	✗ a storyboard;
✗ a comprehension worksheet with a creative title;	✗ a freeze-frame exercise;
✗ hot seating;	✗ an emotional identification chart;
✗ a character interview;	✗ a conventional film review;
✗ a diary or invented interior monologue;	✗ a debate built around opinions assigned by the teacher;
✗ a role card followed by improvisation;	✗ an invitation to claim another community's experience as one's own.
✗ a letter to a character;	

► **Instead**

Nor does it begin by asking students to speak spontaneously about a complicated cultural and cinematic question.

The route begins with choosing, pointing, naming and borrowing a short model. It then builds towards a sentence, a reason, an explanation of a film choice and a qualified argument.

The initial personal reactions are not the analysis. They are the material from which analysis becomes possible.

A universal claim that nobody has ever attempted anything comparable would be impossible to establish. The method and its particular medium below are an original design for this lesson, not a familiar technique presented under a different name.

2. The invention: The Sentence I Cannot Finish Alone

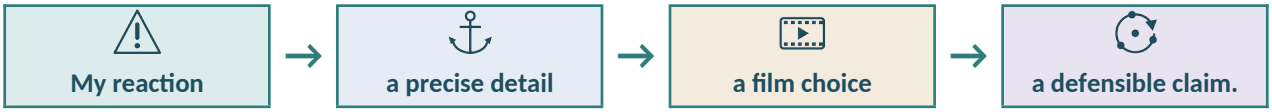

The principle

The student watches as a spectator.

Before and after viewing, a carefully prepared route helps them approach the film personally:

1. If you were a character in the film, who would you be?
2. You arrive in this community: what shocks you?
3. What surprises you?
4. What do you like?
5. Only then: what in the film produced those responses, and how?

Students first collect a few words, not paragraphs. They then select one reaction and make it travel through a physical “speaking circuit”:

The circuit cannot close until another student contributes an observed detail that the speaker must consider.

The final statement belongs to the student, but the student cannot control all the evidence.

The outside-field invention

The design borrows the idea of a circuit from engineering, without pretending that interpretation is an electrical or scientific experiment.

A reaction supplies the starting energy. Evidence connects it to the film. Formal analysis explains the connection. A second spectator tests whether the connection holds.

The paper medium makes a weak link visible:

- remove the film detail;
- try saying the argument;
- notice whether the conclusion still sounds exactly the same.

If it does, the student may have attached film vocabulary to a general opinion rather than analysed the film.

Why it is personal and demanding

The student cannot remain behind:

> “The film shows hope.”

They move towards:

> “I noticed the newcomer first. The framing helped organise that attention. A later detail made my first judgement too narrow.”

The difficulty lies in making a personal response accountable, not in producing complicated English immediately.

The final sentence

The full route eventually produces:

> “At first, I reacted to… because… . The film made me notice… through… . Another detail complicates this because… . I can therefore argue…, but I cannot claim… .”

This is the destination, not the starting instruction.

3. Cultural care: preparing entry without borrowing an identity

The key distinction

The student enters a situation imaginatively.

The student does not acquire someone else's identity, memories or cultural authority.

The existing lesson already asks students to recognise young people's agency and avoid reducing the story to an outsider saving a community. That remains central.

Stage 1 needs an explicit safeguard

The opening question remains:

> "If you were a character in the film, who would you be?"

But students answer it as:

> "Which position could help me enter the situation, and what would that position not allow me to know?"

A student may choose:

Entry position	What the student may do	What the student must not do
The newcomer teacher, as portrayed	Consider arriving with incomplete knowledge.	Claim to know what Inuit people need.
An invented witness	Imagine standing at a particular place and noticing visible or audible events.	Invent testimony or community opinions.
An object	Use an openly imaginative, physically limited position.	Give the object invented cultural or ancestral authority.
A place	Consider entrances, distances, movements and what remains out of view.	Claim to speak as the land or reveal Inuit beliefs.
Alongside a named team member's portrayal	Attribute what the film shows that character saying or doing, then discuss the student's response.	Impersonate the person's private thoughts or lived experience.

For a team-member route:

> "The film portrays [name] doing… . That makes me reconsider…"

Not:

> "I am [name]. This is how Inuit young people feel."

"What shocks you?" is not permission to judge a people

The teacher keeps the student's personal reaction but changes its scope.

Accept:

> "This action shocks me."
>
> "I find this situation unsettling."
>
> "The way the scene presents this surprises me."

Challenge and repair:

> "This community is shocking."
>
> "Their culture is strange."

The next step is always towards a particular represented detail, not a judgement about a whole community.

Surprise is different from shock

For this activity:

- shock means that something unsettles, disturbs or strongly challenges the student;
- surprise means that something differs from an expectation;
- liking means valuing a moment, relationship, action, sound or visual choice.

Students may select:

> "Nothing shocks me."
>
> "I prefer 'unsettles'."
>
> "I do not want to discuss that reaction."

They are never required to intensify an emotion to earn marks.

Personal does not mean confessional

Students do not need to connect the film to trauma, family difficulties or private memories.

A habit of attention is personal enough:

> "I noticed the adult first."
>
> "I expected confidence to mean knowledge."
>
> "I liked the moment when someone listened."

The working rule

> My reaction belongs to me. The experience represented does not become mine.

4. Teacher framework and progression

Lesson title

Lesson 7. The Grizzlies: From My Reaction to My Argument

Sequence: Whose Land, Whose Water?

Film: *The Grizzlies*, 2018, directed by Miranda de Pencier.

Enquiry

How can my personal reaction help me understand a film without making my judgement the centre of someone else's story?

Debate motion

> In *The Grizzlies*, following the newcomer helps us enter the story, but can also limit whose agency we notice.

Accessible version:

> The newcomer helps us understand the story, but we must also notice other people's choices.

The second version lowers the language barrier. It does not replace the issue with an easier one.

Curriculum alignment

For Première générale under the 2025 English programme, the principal connections are:

- "Diversité et inclusion";
- "Art et pouvoir";
- "Les aires anglophones américaines".

"L'être humain et la nature" becomes relevant when students select evidence about relationships with place or land. The official Première targets are B1+ for LVA and B1 for LVB. "Territoire et mémoire" belongs to Terminale in this programme, not Première. education.gouv

For CAP and bac pro, the lesson belongs principally to the context of everyday, personal, social and civic life. It develops cultural understanding, expression about a work, interaction and responsible attribution within the language programme established by the BO spécial of 11 April 2019. education.gouv

What the level labels mean here

The progression below moves from A1/A2-accessible participation towards B1/B1+-oriented performance.

These are teaching targets, not a claim that a student moves up an entire CEFR level in one lesson. A rehearsed complex sentence is not, by itself, evidence of independent B1 performance.

The CEFR distinguishes simple personal responses from increasingly connected explanations, reasons and discussion of cultural works. It also recognises scaffolding and mediation as ways to help learners construct meaning. rm.coe

The progressive ladder

Stage	What the student actually does	Starting access	The deliberate rise in demand
1. Find an entry position	Points, chooses, then names a position and one limit.	Gesture, one word, short frame.	From identification to bounded perspective.
2. Register shock	Selects a reaction word and attaches it to one event.	"Unfair." "This shocks me."	From feeling to a located response.
3. Register surprise	Contrasts expectation and observation.	"I expected… . I saw…"	From naming to comparison.

Stage	What the student actually does	Starting access	The deliberate rise in demand
4. Register liking	Selects something valued and gives a reason.	“I like… because…”	From preference to justification.
5. Anchor	Chooses one reaction and identifies an observable detail.	“We see…” “We hear…”	From response to evidence.
6. Explain form	Links a film choice to what the student noticed or felt.	“The film shows X first. So I notice X.”	From description to a causal explanation.
7. Test and discuss	Imagines one formal change and considers another detail.	Supported choices and prepared response frames.	From one reading to a tested interpretation.
8. Qualify	States a claim and a meaningful limit.	Two or three linked sentences.	Towards B1/B1+ argument, qualification and revision.

The low floor and high ceiling

Everyone performs the same intellectual operations.

What changes is the amount of language support.

Shared operation	Maximum support	Greater independence
Name a response	Point to a printed word, then read it.	Choose a more precise word.
Locate evidence	Select an accurate detail from personal notes or a teacher-checked reminder.	Identify the detail independently.
Explain form	Join two supplied clauses.	Build and qualify a causal explanation.
Respond to another reading	Choose a response frame.	Reformulate and challenge the interpretation.
Conclude	Complete a sentence structure.	Develop a conditional, nuanced claim.

Students may begin with a word. They do not remain there.

The teacher’s lifting routine

Use:

1. Accept the contribution.
2. Offer a slightly fuller model.
3. Ask the student to choose or complete it.
4. Let the student rehearse it.
5. Ask them to reuse it with a different detail.

Example:

Student:	“Unfair.”
Teacher:	“The interruption seems unfair to me. Read that, then add: because…”
Student:	“The interruption seems unfair to me because she cannot finish.”
Teacher:	“Now separate observation from interpretation. What do we actually hear?”

The teacher expands language without supplying the whole interpretation.

5. Before and around viewing

A practical preparation sequence

The preparation is separate from the 52-minute discussion lesson.

Give students the short preparation sheet before they watch at home. It can be introduced in the preceding lesson or completed independently using the models below.

Allow approximately eight minutes before viewing and ten to fifteen minutes afterwards.

Do not require students to complete analysis while the film is playing.

Before assigning the film

The film's educational materials explicitly warn about suicide and emotionally charged content. Preview the film, give a clear warning, offer a non-penalised alternative and use the school's normal safeguarding arrangements. thegrizzliesmovie

Arrange lawful access. Do not assume every student can purchase or stream the film.

Students may:

- stop;
- skip a distressing passage;
- choose a different moment;
- use the neutral alternative;
- decline personal disclosure.

Do not ask a student to inhabit a person experiencing a suicidal crisis.

Before viewing: prepare, do not predict the community

1. Read the brief factual introduction.
2. Learn the entry-position words.
3. Practise the four reaction frames with the neutral model.
4. Choose a provisional entry position.
5. Put the sheet aside.

Before watching, students cannot know which actual character they would choose. Their first choice is therefore provisional. They confirm or change it after viewing.

During viewing

Watch as a spectator.

There is no compulsory writing.

A student may make a brief event note if helpful. Repeated pausing is not required.

Immediately after viewing

Complete the four personal stages in order:

1. confirm the entry position;
2. register shock or an alternative;
3. register surprise;
4. register liking.

At this point, a word or short phrase is enough.

Only then begin analysis.

6. Student document

Lesson 7. From My Reaction to My Argument

My goal

I start with what I can say.

I build a fuller sentence.

I connect it to the film.

I explain how the film shaped my response.

I listen to another reading.

I finish with a claim I can defend.

✎ **My source**

Name: _____

□ I watched *The Grizzlies*.

□ I used the invented alternative scene.

My source: _____

Short introduction

The Grizzlies concerns young people, relationships and a lacrosse team in Kugluktuk, Nunavut. The lesson asks you to notice young people's choices and avoid reducing the story to an outsider's achievement.

You will speak about a film.

You will not speak for a community.

Make your medium: the speaking circuit

You need:

- one A4 sheet;
- two small pieces of paper;
- a pen.

Top half: four entry spaces

My entry position	What shocks or unsettles me	What surprises me	What I like
One word or phrase	One word or phrase	One word or phrase	One word or phrase

Bottom half: one analytical circuit

My chosen response	My observed detail	The film choice and its effect	My claim and its limit
Start personally.	Anchor it.	Explain it.	Make it defensible.

Write your observed detail on the first small piece of paper.

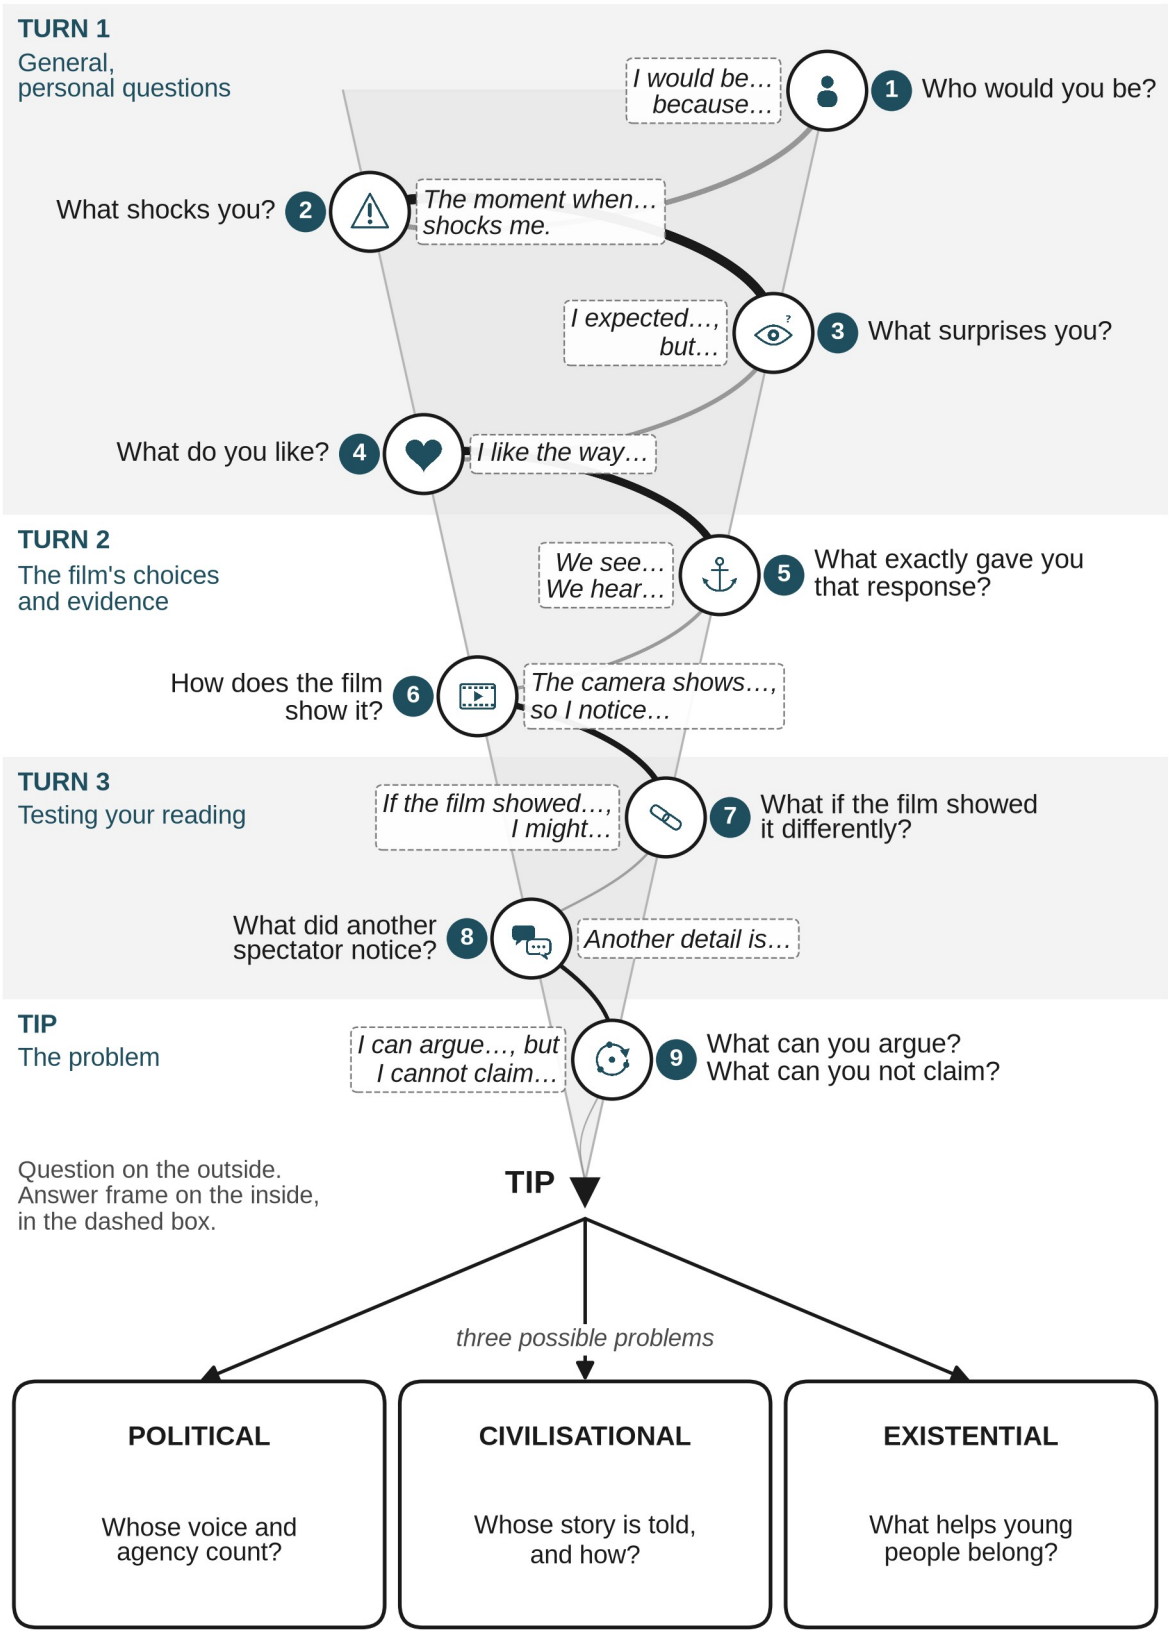

Keep the second piece blank for a partner's returned detail.

You will complete one circuit, not analyse every reaction.

Your spiral of questions

A way to organise your thinking: from a general question to a real problem.

Use it to launch your study. Reuse it later with other films or texts.

Spiral method devised by Madame Carole Paoli Pompougnac.

The nine stations of the spiral

Each station has a question, an answer you can start from, the kind of thinking you do, and the language you practise.

Station	Question	Answer	Reasoning	Acquisition
1	Who would you be?	I would be… because…	personal reaction: choosing a way in	I would be + because
2	What shocks you?	The moment when… shocks me.	personal reaction	emotion adjectives: unsettled, uncomfortable, disturbed
3	What surprises you?	I expected…, but…	personal reaction: expectation and what I saw	I expected… / but…
4	What do you like?	I like the way…	personal reaction with a reason	I like the way… / I value… because…
5	What exactly gave you that response?	We see… / We hear…	observation	we see / we hear
6	How does the film show it?	The camera shows…, so I notice…	film-language analysis	the camera + verb: shows, frames, follows; so
7	What if the film showed it differently?	If the film showed…, I might…	testing the evidence	if + past simple, might + base verb
8	What did another spectator notice?	Another detail is…	testing the evidence against another viewpoint	another detail is…; supports, complicates, changes
9	What can you argue? What can you not claim?	I can argue…, but I cannot claim…	qualified argument	although / I can argue / I cannot claim

► **Turns of the spiral**

Turn 1, stations 1 to 4: general, personal questions.

Turn 2, stations 5 and 6: the film's choices and evidence.

Turn 3, stations 7 and 8: testing your reading.

The tip, station 9: the problem, political, civilisational or existential.

Spiral method devised by Madame Carole Paoli Pompougnac.

1 Stage 1. Find your entry position

What the student does: Points, chooses, then names a position and one limit.

► **The invitation**

> If you were a character in the film, who would you be?

For this task, choose an entry position, not a borrowed identity.

■ **Word bank: Start by pointing or choosing**

- □ newcomer teacher
- □ invented witness
- □ imagined object
- □ imagined place
- □ alongside the film's portrayal of a named team member

Build the language

Supported route A1/A2	**Extended route** B1/B1+
First: > "A witness." **Then:** > "I choose an invented witness." **Then:** > "I choose an invented witness because I want to notice who speaks."	**Go further:** > "This position gives access to the exchange, but not to anyone's private thoughts."

✎ **My entry**

I choose: _____

Because: _____

My access stops at: _____

You may change your entry after watching.

2 ⚠ Stage 2. Arrive: register shock

What the student does: Selects a reaction word and attaches it to one event.

► **The invitation**

> You arrive in this community, as represented by the film. What shocks you?

This is a thought experiment after viewing.

You are not claiming to have visited the real community.

■ **Word bank: Choose a response**

unsettled, disturbed, angry, uncomfortable, unsure, not shocked.

You may point to a word first.

Build the language

Supported route A1/A2	**Extended route** B1/B1+
First: > "Uncomfortable." **Then:** > "This makes me uncomfortable." **Then:** > "The moment when… makes me uncomfortable."	**Go further:** > "This action unsettles me because…, but my reaction does not explain how everyone in the scene feels."

✎ **My entry**

Word or phrase: _____

Optional first sentence:

> "The moment when _____ unsettles me."

Do not write "the community is shocking".

3 Stage 3. Notice surprise

What the student does: Contrasts expectation and observation.

► **The invitation**

> What surprises you?

Surprise means that something differs from what you expected.

■ **Word bank: Choose a starting word**

unexpected, different, sudden, quiet, confident, hesitant, supportive.

Build the language

Supported route A1/A2	Extended route B1/B1+
First: "Different." **Then:** "I expected… . I saw…" **Then:** "I expected…, but the film shows…"	**Go further:** "My expectation may reveal more about my assumptions than about the people represented."

✎ **My entry**

> "I expected _____, but I noticed _____."

If you had no clear expectation:

> "I did not expect the film to draw my attention to _____."

4 ❤ Stage 4. Choose something you value

What the student does: Selects something valued and gives a reason.

► **The invitation**

> What do you like?

Choose something precise:

- an action;
- an exchange;
- a relationship;
- a moment of listening;
- a sound;
- a way of showing a place;
- an instance of initiative or support.

Build the language

Supported route A1/A2	Extended route B1/B1+
First: > "Listening." **Then:** > "I like this moment of listening." **Then:** > "I value this moment because…"	**Go further:** > "I value the way the film presents…, although…"

✎ **My entry**

> "I value _____ because _____."

You do not have to turn difficult circumstances into something positive.

5 Stage 5. Choose one reaction and anchor it

What the student does: Chooses one reaction and identifies an observable detail.

Circle one of your three reactions.

Leave the others behind for now.

► **The first analytical question**

> What exactly in the film gave me that response?

Write one observable detail on the first small piece of paper.

Use:

> “We see…”
>
> “We hear…”
>
> “[Name] says or does…”

✎ **My detail**

_____

Label it O: observed.

Do not replace an observable detail with an assumed feeling.

Not:

> “Everyone feels rejected.”

Better:

> “The character leaves before the exchange ends.”

Tick grid 1. What does each moment do?

These moments come from the practice scene, The Community Repair Table.

Tick how each moment makes you react. Several answers are possible.

Then tick the film tool you notice.

In the last row, add one moment of your own from *The Grizzlies*.

	My reaction			The film's tool			
Moment	**shock**	**surprise**	**like**	**framing**	**sound**	**editing**	**point of view**
The opening shot shows Alex's face.	☐	☐	☐	☐	☐	☐	☐
Leah says sharply "Wait."	☐	☐	☐	☐	☐	☐	☐
A piece falls. We hear the impact. There is no music.	☐	☐	☐	☐	☐	☐	☐
A wider shot reveals Leah holding a replacement piece.	☐	☐	☐	☐	☐	☐	☐
Alex puts down the glue.	☐	☐	☐	☐	☐	☐	☐
We see the teenagers' plan only after Alex's offer.	☐	☐	☐	☐	☐	☐	☐
The final shot stays on the teenagers. Alex's hands remain at the edge.	☐	☐	☐	☐	☐	☐	☐
My moment from *The Grizzlies*: _____	☐	☐	☐	☐	☐	☐	☐

Answers: correction sheet. Your reactions can differ from your partner's.

6 Stage 6. Find the film's part in your reaction

What the student does: Links a film choice to what the student noticed or felt.

► **The second analytical question**

> How does the film make this detail available to me?

Choose the strongest tool.

Tool	Simple starting point	Fuller analytical language
Framing	"The image shows… and leaves out…"	"The framing foregrounds…"
Sound	"We hear… before we see…"	"The sound directs my attention towards…"
Editing	"The film shows X first, then Y."	"The order of shots delays…"
Point of view	"At this moment, we know…"	"Our access is organised around…"

Build the explanation

Supported route A1/A2	Extended route B1/B1+
First: "The film shows the adult first." **Then:** "The film shows the adult first, so I notice the adult's response." **Then:** "By showing the adult first, the film directs my attention towards that response."	**Go further:** "This encourages my first reading, but the later shot complicates it."

✎ **My explanation**

> "The film _____, so I _____."

Or:

> "By _____, the film encourages me to _____."

Label the effect I: interpretation.

7 Stage 7. Test the connection

What the student does: Imagines one formal change and tests the first reading.

► **The third analytical question**

> Would my reaction change if the film presented the same event differently?

Choose one change:

- ☐ show more of the setting;
- ☐ show another person first;
- ☐ remove the music;
- ☐ let a pause last longer;
- ☐ change the order of two shots;
- ☐ delay or reveal information earlier.

Do not change the story event.

Build the language

Supported route A1/A2	Extended route B1/B1+
Supported version: "Show the other person first. I might notice them sooner."	**Fuller version:** "If the film showed the other person first, I might notice their initiative sooner." **Go further:** "That might alter the balance of my attention without changing the event itself."

✎ **My test**

> "If the film _____, I might _____."

Label it P: proposed alternative.

This is a test of your reading, not proof of what every spectator would feel.

8 Stage 8. Let another spectator contribute

What the student does: Receives another spectator's detail: supports, complicates or changes.

Your partner gives you one relevant observed detail.

They do not tell you what to feel.

Write the detail on your second piece of paper.

Partner's detail:

_____

If it cannot be checked, label it "?" and do not treat it as established.

Word bank: Choose your response

- ☐ This supports my reading.
- ☐ This complicates my reading.
- ☐ This makes me change my reading.

Then complete:

> "Your detail _____ my reading because _____."

Tick grid 2. Whose idea is it?

Read each idea. Who does it belong to?

Tick one box, or more if you need to.

Remember the working rule: my reaction belongs to me. The experience represented does not become mine.

Idea	The newcomer teacher	The young players	The community, as the film shows it	The film-maker's choices	Another spectator	Me
Arrives with incomplete knowledge.	☐	☐	☐	☐	☐	☐
Takes the initiative and makes choices.	☐	☐	☐	☐	☐	☐
Was there before the newcomer arrived.	☐	☐	☐	☐	☐	☐
Shows the newcomer first.	☐	☐	☐	☐	☐	☐
Lets us hear something before we see it.	☐	☐	☐	☐	☐	☐
Gives me a detail I had missed.	☐	☐	☐	☐	☐	☐
"This moment unsettles me."	☐	☐	☐	☐	☐	☐
"I expected confidence to mean knowledge."	☐	☐	☐	☐	☐	☐

Answers: correction sheet.

9 Stage 9. Close the circuit

What the student does: States a claim and a meaningful limit.

Temporarily remove your first evidence piece.

Try saying your argument.

If nothing in the argument changes, check the connection between your evidence and your conclusion.

Replace the detail and complete:

> “At first, I _____.”
>
> “The film made me notice _____ through _____.”
>
> “Another detail _____.”
>
> “I can therefore argue _____.”
>
> “I cannot claim _____.”

✎ **My cultural-care limit**

> “This is my response to a representation. It is not _____.”

My speaking route

Supported route A1/A2	Extended route B1/B1+
“At first, I felt or noticed…” “We see or hear…” “The film shows… first, so…” “Your detail makes me…” “I think…, but I cannot claim…”	**Add:** “If the film…, I might…” “Although…” “This supports or challenges the debate motion because…”

Notes are allowed.

Preparation is allowed.

A thoughtful answer does not have to be spontaneous.

7. Visual and gesture supports

These supports are navigation tools, not a storyboard.

Four simple picture prompts

Use the following text diagrams as printed visual prompts. They represent formal choices, not actual film scenes.

Framing

SMALL FRAME	WIDER FRAME
[one person]	[person | other person | setting]

Sentence:

> "The wider frame lets me notice…"

Sound

SOUND HEARD	SOURCE NOT VISIBLE
[I hear it]	[I cannot yet see it]

Sentence:

> "We hear… before we see…"

Editing

A THEN B	B THEN A
[response] [action]	[action] [response]

Sentence:

> "The order makes me notice…"

Point of view

CHARACTER'S ACCESS	AUDIENCE'S ACCESS
[knows this]	[knows this and more]

Sentence:

> "We know…, but the character does not yet know…"

Gesture support

Students may:

- point to a word;
- indicate "first" and "then" with two hands;
- bring two paper pieces together to show a connection;
- separate them to show a missing link;
- point to the printed response "supports", "complicates" or "changes".

Then they read or complete the associated sentence.

Gesture opens the route. It does not become a permanent substitute for building language.

8. Complete worked example

Source status

The following scene is invented.

It is not from *The Grizzlies*.

Neutral scene: The Community Repair Table

Teenagers are repairing a model bridge for a local exhibition.

Alex, a newly arrived adult volunteer, approaches the table.

The opening shot shows Alex's face.

Alex says:

> "I can fix that."

A piece falls. Its impact is clearly audible. There is no music.

The next shot shows Alex reaching for glue.

Leah says sharply:

> "Wait."

A wider shot reveals Leah holding a replacement piece. Another teenager is adjusting the supports.

Alex puts down the glue.

Leah points to a support. Alex holds it.

The final shot stays on the teenagers testing the bridge. Alex's hands remain visible at the edge.

Stage 1. Who would I be?

Word:

> "Newcomer."

Short sentence:

> "I choose the newcomer's position."

Reason:

> "I choose this position because I also do not know the group's plan."

Limit:

> "I cannot know what the group discussed before Alex arrived."

Stage 2. What shocks or unsettles me?

Word:

> "Abrupt."

Short sentence:

> "Leah's sharp 'Wait' unsettles me."

Developed response:

> "At first, the interruption seems unfriendly to me."

Boundary:

> "That is my response to the delivery. It does not establish Leah's attitude towards Alex."

Stage 3. What surprises me?

Short contrast:

> "I expected Alex to repair the bridge. The teenagers already have a plan."

Developed response:

> "The wider shot surprises me because it reveals preparation I had not seen."

Stage 4. What do I like?

Word:

> "Listening."

Sentence:

> "I value Alex putting down the glue."

Reason:

> "I value that action because Alex becomes useful without taking over."

Stage 5. Which response will I analyse?

Selected response:

> "My first judgement of 'Wait' as unfriendly."

Observed detail:

> "Leah says 'Wait' before the wider shot reveals the replacement piece."

This is more precise than:

> "Leah is rude."

Stage 6. What does the film do?

Accessible explanation: A1/A2	**More developed explanation:** B1/B1+
"The film shows Alex first. We see the teenagers' plan later. So I understand Alex's action before I understand Leah's interruption."	"Framing and editing initially organise my attention around Alex's offer. The wider shot then gives me information that makes Leah's interruption seem practical rather than simply hostile."

The student does not claim that the camera proves Leah's motive.

Stage 7. What if the presentation changed?

Supported version: A1/A2	**Full version:** B1/B1+
"Show the whole table first. I might understand 'Wait' sooner."	"If the film showed the wider shot first, I might hear 'Wait' as a useful instruction rather than an unfriendly interruption."

Stage 8. What does another spectator return?

Partner's detail:

> "Alex still helps at the end."

The detail complicates a possible overcorrection:

> "The adult should do nothing."

Response:

> “Your detail complicates my reading because the scene does not reject help. It changes who directs the help.”

Stage 9. Final contribution

Supported version A1/A2	**Extended version** B1/B1+
“At first, ‘Wait’ seemed unfriendly. The film shows Alex’s offer before the teenagers’ plan. So I understand the interruption only later. Alex still helps at the end. I think the scene values listening, but I cannot claim to know Leah’s private feelings.”	“At first, I interpreted Leah’s ‘Wait’ as unfriendly. That reaction partly came from the order of information: the film centred Alex’s offer before revealing the teenagers’ preparation. If the wider shot came first, I might understand the interruption differently. My partner noticed that Alex still contributes at the end. The scene therefore complicates a simple choice between taking over and doing nothing. I read it as valuing responsive help, although the scene does not establish Leah’s private feelings.”

What has risen?

The student has moved from:

> “Rude.”

To:

> “My first judgement depended partly on information the film had not yet given me.”

That is genuine analytical progress, even when expressed through short, supported sentences.

The neutral scene demonstrates the method. It cannot serve as evidence about *The Grizzlies*.

9. The 52-minute debate lesson

Preparation already completed

Before arriving, students have:

- watched their source;
- completed the four entry spaces;
- selected one reaction;
- attempted an evidence connection.

They are not expected to have a polished argument.

Timetable

Time (minutes)	Stage (activity)	Student action and support (student task)	Teacher role	Language focus
0 to 4	Diagnostic re-entry	Point to a reaction, say the word, then complete "The moment when… makes me…". Partner checks the source and limit.	circulates, notes each first word, prompts the frame	"The moment when… makes me…"; reaction words
4 to 9	Rebuild the personal route	In pairs, confirm entry position, then share shock, surprise and liking in that order. Use frames. Each student selects one response.	accepts single words, then offers a fuller model	"I choose…", "I expected…, but…", "I value… because…"
9 to 16	Anchor and explain	Complete the evidence piece. Choose one formal tool. Build "The film…, so I…". Partners rehearse before speaking to the group.	models one tool, checks details are observable	"We see…", "The film…, so I…"; framing, sound, editing, point of view
16 to 21	Midpoint check	Identify observation and interpretation. Test a formal change using a supported or extended frame. Teacher gives one improvement target.	gives each student one improvement target	O, I, P labels; "If the film…, I might…"
21 to 26	Language repair	Complete the core exercises. Check answers. Improve one sentence on the circuit.	runs the answer check, targets one recurring error	because, but, so; If + past simple, might + base verb
26 to 38	Scaffolded debate	Three four-minute rounds in groups of four. Everyone speaks in each round using the protocol below.	times the rounds, checks that everyone speaks, repairs claims about communities	"Another detail is…"; supports, complicates, changes; "Although…"
38 to 41	Collective judgement	Each group submits one qualified sentence. Hear selected sentences and identify an unresolved disagreement.	selects sentences, names one unresolved disagreement	"I can therefore argue…, but I cannot claim…"
41 to 44	Individual assessed conclusion	Each student records a short conclusion, or writes it while the teacher uses the earlier observed oral contribution.	records the observed oral contribution	a qualified claim with a limit
44	▲ Point of arrest	Stopping point: see below.	Eight-minute emergency exit available	
44 to 49	Written record and self-correction	Keep the written record. Identify one weakness and produce a corrected version.	points students to the self-correction grid	a corrected because, but or conditional sentence
49 to 52	Homework and flashcards	Make two cards. Retrieve one aloud. Note homework.	sets homework, checks one card per student	flashcard: item, meaning, example

Minutes 52 to 55 allow for collection and departure.

Debate round 1. Put evidence beside a reaction

Four minutes.

Each student uses:

> “At first…”
>
> “We see or hear…”
>
> “The film…, so…”

Maximum individual turn: approximately 40 seconds.

The remaining time allows clarification.

Debate round 2. Return a detail

Four minutes.

Each student offers one relevant detail.

Supported frame: A1/A2	**Fuller frame:** B1/B1+
“Another detail is…”	“Your reading also needs to account for…”

The recipient chooses:

> “Supports.”
>
> “Complicates.”
>
> “Changes.”

Then expands:

> “It complicates my reading because…”

Debate round 3. Make a defensible claim

Four minutes.

Supported frame: A1/A2	**Extended frame:** B1/B1+
“I now think…, because… . But I cannot claim…”	“Although…, I argue… because… . This remains limited to…”

The group produces one sentence responding to the motion.

Disagreement may remain.

Speaking is prepared interaction

Students may:

- read a frame;
- rehearse quietly;
- consult their word bank;
- ask for repetition;
- take a short planning pause;
- point first and speak second.

They may not be required to improvise fluent speech as proof that they have understood.

Point of arrest

Minute 44.

Every student should by then have:

- spoken;
- connected a reaction to evidence;
- explained one film choice;
- considered another contribution;
- reached an individual provisional conclusion.

Eight-minute emergency exit

This replaces minutes 44 to 52.

44 to 46:	partners each say a conclusion and a limit.
46 to 49:	keep the short written record.
49 to 51:	note homework and make one flashcard.
51 to 52:	correct one “because”, “but” or conditional sentence.

Written record

> My reaction is a starting point, not proof. I identify what the film shows or lets me hear. I explain how framing, sound, editing or point of view influences my response. Another spectator may notice something I missed. I can make an interpretation while recognising that I do not possess another person’s experience.

Personal sentence:

> “My first reading became more precise when _____.”

Homework

1. Use the self-correction grid.
2. Improve the conclusion.
3. Record it with notes.
4. Reuse one film term and one reasoning structure.
5. State one limit.
6. Revise two flashcards.

Supported route: approximately 30 seconds.

Extended route: approximately 45 to 60 seconds.

For lesson 8, retain the circuit as evidence of a tested film interpretation. Do not use it alone as factual evidence about a particular land or water dispute.

10. Building your vocabulary and useful language

Entry and reaction vocabulary

Starting words	More precise alternatives	Example
shocked	unsettled, disturbed, uncomfortable	“The interruption unsettles me.”
surprised	unexpected, contrary to my expectation	“The response is unexpected.”
good	supportive, attentive, generous, effective	“I value the attentive response.”
bad	unfair, dismissive, intrusive, premature	“The intervention seems premature.”
strong	confident, determined, authoritative	“The delivery sounds confident.”
quiet	silent, hesitant, restrained	“The response is restrained.”

More advanced vocabulary is an option, not a requirement to replace every familiar word.

Theme vocabulary

Word or phrase	Meaning	Example
newcomer	someone who has recently arrived	“The newcomer lacks some information.”
agency	the capacity to act and influence events	“The later shot makes agency visible.”
initiative	beginning or proposing an action	“I overlooked another initiative.”
mutual support	people helping one another	“The scene suggests mutual support.”
take over	assume control from others	“Helping does not have to mean taking over.”
make room for	allow space or opportunity	“The film makes room for another response.”
belonging	a sense of connection or acceptance	“The exchange raises an issue of belonging.”

Analytical lexis

Accessible wording	More developed wording
“shows first”	“foregrounds”
“does not show yet”	“withholds information”
“makes me look at”	“directs my attention towards”
“changes my idea”	“complicates my interpretation”
“makes my claim more careful”	“qualifies my claim”
“says whose view it is”	“attributes the viewpoint”

Grammar staircase

Step 1. A complete statement

> “I notice the newcomer.”

Subject + verb + object.

Step 2. A reason

> “I notice the newcomer because the film shows the newcomer first.”

Use “because” to explain.

Step 3. A contrast

> “I notice the newcomer first, but another person also takes the initiative.”

Use “but” to complicate.

Step 4. A formal effect

> “The film delays the wider shot, so I discover the preparation later.”

Use “so” for a consequence.

Step 5. A hypothetical test

> “If the wider shot came first, I might notice the preparation sooner.”

Use:

> If + past simple, might + base verb.

Step 6. A qualified argument

> “Although the newcomer guides my first response, the later shot redistributes my attention.”

Use “although” to hold two ideas together.

Students do not need every structure in every contribution.

Interaction language

For help:

> “Can you repeat that?”
>
> “Please speak more slowly.”
>
> “I need a moment.”
>
> “Can I use the sentence frame?”

For evidence:

> “Which moment do you mean?”
>
> “Is that observed or inferred?”

For response:

> “That supports my reading.”
>
> “That makes my first claim too simple.”
>
> “I agree about the detail, but not its meaning.”

For limits:

> “The scene does not establish that.”
>
> “This is my response, not the character’s testimony.”
>
> “One film does not represent every Inuit experience.”

11. Language practice and answers

Core exercise 1. Match

Items	Definitions
1. newcomer	a. make a claim more precise
2. agency	b. someone who has recently arrived
3. take over	c. the capacity to act
4. qualify a claim	d. assume control

► **Answers:**

1b, 2c, 3d, 4a.

Core exercise 2. Join

Use “because”, “but” or “so”.

1. I expected an immediate repair. The group already had a plan.
2. The wider shot comes later. I notice the preparation later.
3. I change my reading. Another detail complicates it.

► **Model answers:**

1. I expected an immediate repair, but the group already had a plan.
2. The wider shot comes later, so I notice the preparation later.
3. I change my reading because another detail complicates it.

Core exercise 3. Complete one level above your first attempt

Choose one.

A:

> “We see _____.”

Then add:

> “So I notice _____.”

B:

> “The film _____, so I _____.”

Then add a contrast.

C:

> “If the film _____, I might _____.”

Then add a limit.

► **Model answers:**

A:

> “We see Alex first. So I notice Alex’s response.”

B:

> “The film shows Alex first, so I notice the offer, but the wider shot reveals another plan.”

C:

> “If the film showed the whole table first, I might notice the teenagers’ preparation sooner. That would not establish their private feelings.”

Further exercise 4. Replace an assumed feeling

Rewrite:

> “Everyone feels rejected.”

► **Model answer:**

> “The film shows one person leaving. That does not establish everyone’s feelings.”

Further exercise 5. Transform

1. The film shows the group first. My attention may change.

Begin:

> “If…”

2. The newcomer is central. Other people also act.

Begin:

> “Although…”

► **Answers:**

1. If the film showed the group first, my attention might change.
2. Although the newcomer is central, other people also act.

Further exercise 6. Label

Use O, I or P.

1. The film cuts to a wider shot.
2. The delay makes me trust the first solution more quickly.
3. If the shot came earlier, I might respond differently.

► **Answers:**

1. O;
2. I;
3. P.

Further exercise 7. Oral reuse

Speak for twenty seconds.

Use:

- one reaction word;
- one film term;
- one connector.

► **Model:**

> “At first, I feel uncomfortable. The editing delays the wider shot, so I do not yet see the preparation.”

Further exercise 8. Short written analysis

Write:

1. a reaction;
2. an observation;
3. a formal explanation;
4. a limit.

► **Model:**

> “The interruption initially unsettles me. We hear ‘Wait’ before the wider shot. The editing delays information that changes my reading. I cannot claim to know the speaker’s private feelings.”

Flashcards

Method

1. Choose one word and one structure you needed.
2. Write the item on the front.
3. Add its meaning and an example on the back.
4. Say the answer before turning the card.
5. Check and retrieve again later.

Model card 1

Front:	Back:
“overlook”	“Fail to notice or consider.” “I initially overlooked another initiative.”

Model card 2

Front:	Back:
“The film…, so I…”	“Connect a film choice to a response.” “The film delays the wider shot, so I discover the plan later.”

Model card 3

Front:	Back:
“If the film…, I might…”	“Test an imagined formal alternative.” “If the film showed the group first, I might notice its preparation sooner.”

Blank card

Front: _____

Meaning or structure: _____

My example: _____

Revision

End of lesson:	retrieve one card aloud.
At home:	retrieve both before checking.
Start of lesson 8:	use both in a brief contribution.

12. Assessment

What is assessed

- movement from reaction to reasoning;
- use of evidence;
- understanding of a film choice;
- attribution and cultural care;
- response to another contribution;
- vocabulary and syntax.

Emotional intensity, confession, theatrical performance and agreement with the teacher are not assessed.

Diagnostic assessment

Student brief

> “I choose…”
>
> “This moment makes me…”
>
> “We see or hear…”

A supported frame is allowed.

Teacher grid

Criterion	Secure	Developing	Next support
Entry	Names a position without claiming an identity.	Needs help defining the position.	Offer a choice and a limit frame.
Reaction	Attaches a reaction to a moment.	Gives an isolated adjective.	Expand with “The moment when…”
Evidence	Names an observable detail.	Gives an assumed feeling.	Contrast “we see” with “I infer”.
Language	Produces an intelligible sentence with support.	Uses words or fragments.	Model a short sentence, then rehearse.

Student diagnostic self-correction

> “I first said: _____.”
>
> “What was missing: _____.”
>
> “My fuller version: _____.”

No grade is needed.

Midpoint formative assessment

Student brief

Explain:

> “The film…, so I…”

Then test:

> “If the film…, I might…”

Teacher grid

Criterion	Secure	Developing	Needs repair
Evidence	Precise, observable detail.	Detail identifiable but vague.	Inference presented as fact.

Criterion	Secure	Developing	Needs repair
Analysis	Formal choice linked to response.	Technique named without a clear effect.	Only plot or emotion described.
Test	Changes presentation, not events.	Relevant change, unclear consequence.	Invents a different event.
Cultural care	Response and experience distinguished.	One claim needs qualification.	Speaks for another person or community.
Language	Connector and target vocabulary used clearly.	Errors remain but reasoning is understandable.	Wording obscures the connection.

Student midpoint self-correction

> “The weak connection was: _____.”
>
> “My original wording: _____.”
>
> “My improved wording: _____.”
>
> “It is better because: _____.”

Summative student brief

Submit your circuit and individual conclusion.

Show:

1. an initial response;
2. an observed detail;
3. a film choice and its effect;
4. a response to another detail;
5. a claim with a limit.

Use the support you need. The teacher records how independently the language is produced.

Teacher summative grid: 20 marks

Award 0 to 4 in each category.

Criterion	4	3	2	1	0
Personal response developed into reasoning	Precise response becomes a carefully justified claim.	Clear response and relevant reasoning.	Response linked to a simple reason.	Reaction named without development.	No assessable contribution.
Evidence and film analysis	Accurate detail, persuasive formal explanation and productive test.	Accurate evidence and clear formal effect.	Detail and technique present, link partly explained.	General impression or plot summary.	No relevant evidence, or invented evidence presented as observed.
Cultural care	Consistent attribution and meaningful limits.	Appropriate attribution and clear limit.	Some imprecision remains.	Repeated unsupported claims about others.	Uncorrected speaking for a community.
Listening and revision	Integrates another detail and explains its consequence precisely.	Responds meaningfully to another reading.	Acknowledges a detail with a simple response.	Mentions discussion without using it.	No assessable response.

Criterion	4	3	2	1	0
Language	Precise vocabulary, controlled linking and target syntax; clear expression.	Relevant vocabulary and mostly controlled sentences.	Meaning clear through supported sentences and simple connectors.	Words or fragments with limited sentence building.	Insufficient language to assess.

A fully scaffolded successful performance is recorded as such. It is not automatically described as independent B1 performance.

Reading notes and using sentence frames are permitted.

Student summative self-correction grid

Criterion	My first version	What I missed	My improved version
Reaction to reasoning	_____	_____	_____
Evidence and form	_____	_____	_____
Cultural care	_____	_____	_____
Response to another detail	_____	_____	_____
Language	_____	_____	_____

◆ **Worked example:**

Criterion	First version	Problem	Improved version
Analysis	“The camera is good.”	No precise choice or effect.	“The wider shot reveals preparation I had not seen.”
Cultural care	“She feels angry.”	Private feeling stated as known.	“Her delivery sounds sharp to me, but that does not establish her feelings.”
Language	“If the film will show more, I might understand.”	Incorrect form for the imagined alternative.	“If the film showed more, I might understand differently.”

Final instruction:

> Rewrite or rerecord. Mark the changes. Explain which correction most improved the argument.

13. Standalone dyslexia-friendly version

Presentation for the teacher

Print this separately.

Use:

- a clear sans-serif font;
- at least 14-point text;
- left alignment;
- generous spacing;
- one task block at a time;
- no meaning carried by colour alone.

Students may write, type, dictate or record.

The paper circuit is optional. Four clearly separated spaces are sufficient.

From My Reaction to My Argument

Page 1. Start here

Your goal

Start with a word.

Build a sentence.

Name a detail.

Explain a film choice.

Listen to another idea.

Finish carefully.

Your source

☐ I watched *The Grizzlies*.

☐ I use the invented scene below.

My source:

_____

Your safety rule

You may stop.

You may choose another moment.

You may use the alternative.

You do not have to explain a private reason.

Your cultural-care rule

My response is mine.

Another person’s experience is not mine.

Say:

> “The film shows…”

Do not say:

> “I know how Inuit people feel.”

Page 2. Your alternative scene

The Community Repair Table

This scene is invented.

It is not from *The Grizzlies*.

Teenagers repair a model bridge.

Alex is a new adult volunteer.

The first shot shows Alex’s face.

Alex says:

> “I can fix that.”

A piece falls.

We hear the impact.

There is no music.

Alex reaches for glue.

Leah says:

> “Wait.”

A wider shot shows more of the table.

Leah has a replacement piece.

Another teenager adjusts the supports.

Alex puts down the glue.

Alex holds a support where Leah points.

The teenagers test the bridge.

Alex’s hands remain at the edge.

You can complete every task using this scene.

Page 3. Find your entry

Task 1. Who would you be?

◆ **Worked example:**

> “I choose the newcomer’s position. I do not know the group’s plan.”

Now choose:

☐ newcomer

☐ invented witness

☐ imagined object or place

☐ alongside a named character’s portrayal

Complete:

> “I choose _____.”
>
> “I cannot know _____.”

✓ **Self-check**

☐ I chose a position.

☐ I did not claim another person’s identity.

► **Possible answer:**

> “I choose an invented witness. I cannot know private thoughts.”

⚠ Page 4. Register shock

Task 2. What unsettles you?

◆ **Worked example:**

Word:

> “Abrupt.”

Sentence:

> “Leah’s sharp ‘Wait’ unsettles me.”

Choose a word:

uncomfortable, disturbed, angry, unsure, not shocked.

Then complete:

> “The moment when _____ makes me _____.”

You may write:

> “Nothing shocks me.”

✓ **Self-check**

☐ I name a moment or action.

☐ I do not judge a whole community.

There is no single correct emotional response.

Page 5. Register surprise

Task 3. What differs from your expectation?

◆ **Worked example:**

> “I expected Alex to repair the bridge. The teenagers already have a plan.”

Now complete:

> “I expected _____.”
>
> “But the film shows _____.”

If you had no clear expectation:

> “I did not expect to notice _____.”

✓ **Self-check**

☐ I compare an expectation with something shown.

☐ I do not invent a fact.

► **Possible answer:**

> “I expected Alex to use the glue, but Alex puts it down.”

❤ Page 6. Choose something you value

Task 4. What do you like?

◆ **Worked example:**

Word:

> “Listening.”

Sentence:

> “I value Alex listening because the teenagers already have a plan.”

Choose a starting word:

listening, support, patience, initiative, teamwork.

Complete:

> “I value _____ because _____.”

✓ **Self-check**

☐ I identify something precise.

☐ I add a reason.

You do not have to like everything.

Page 7. Choose one reaction

Task 5. Anchor it in a detail

◆ **Worked example:**

Reaction:

> “The interruption unsettles me.”

Detail:

> “Leah says ‘Wait’ before we see the whole table.”

Now choose one reaction.

Write:

> “We see _____.”

Or:

> “We hear _____.”

✓ **Self-check**

☐ Another spectator could check my detail.

☐ I did not write an assumed feeling.

► **Possible details from the alternative scene:**

- Alex reaches for glue.
- Leah says “Wait.”
- The wider shot shows a replacement piece.

Page 8. Explain the film choice

Task 6. Build the connection

◆ **Worked example:**

> “The film shows Alex first, so I notice Alex’s response.”

Choose one:

☐ framing: what the image includes

☐ sound: what we hear

☐ editing: the order of shots

☐ point of view: what information we can access

Complete:

> “The film _____.”

Then add:

> “So I notice _____.”

Join them if you can:

> “The film _____, so I _____.”

✓ **Self-check**

☐ I name something the film does.

☐ I explain its effect on my attention.

► **Possible answer:**

> “The film delays the wider shot, so I see the teenagers’ preparation later.”

Tick grid 1. What does each moment do?

◆ **Worked example:**

Look at the example first.

Moment	shock	surprise	like	sound	framing
We hear the impact.				✓	

Now tick each moment.

Your reaction: tick one or more boxes.

The film tool: tick one box.

Moment	shock	surprise	like	sound	framing
Leah says “Wait.”	☐	☐	☐	☐	☐
A wider shot shows more of the table.	☐	☐	☐	☐	☐
Alex puts down the glue.	☐	☐	☐	☐	☐

✓ **Self-check**

✓ = the answer. (✓) = a possible answer. Your reaction can be different.

Moment	shock	surprise	like	sound	framing
Leah says “Wait.”	(✓)			✓	
A wider shot shows more of the table.		(✓)			✓
Alex puts down the glue.			(✓)		

Page 9. Test your reading

Task 7. Change the presentation

◆ **Worked example:**

> “If the wider shot came first, I might understand ‘Wait’ differently.”

Now choose:

☐ show another person first

☐ show more of the room

☐ remove music

☐ make a pause longer

Complete:

> “If the film _____,
> I might _____.”

✓ **Self-check**

☐ I changed presentation.

☐ I did not invent a different event.

► **Possible answer:**

> “If the film showed the whole table first, I might notice the teenagers’ plan sooner.”

Page 10. Receive another detail

Task 8. Respond

◆ **Worked example:**

Returned detail:

> “Alex still helps at the end.”

Response:

> “This complicates my reading because listening does not mean doing nothing.”

In class

Ask your partner:

> “What detail should I also consider?”

Write it:

_____

Alone after an absence

For the invented scene, use:

> “Alex still helps at the end.”

For *The Grizzlies*, use this challenge:

> “Have I noticed only the newcomer? Check one relevant action by another character.”

Only add a detail you can verify.

Label:

> “Independent route: response to a supplied challenge.”

Complete:

> “This supports, complicates or changes my reading because _____.”

✓ **Self-check**

☐ I used evidence from my actual source.

☐ I explained its consequence.

An independent response is not described as live interaction.

Tick grid 2. Whose idea is it?

◆ **Worked example:**

Look at the example first.

Idea	Alex	the teenagers	the film	my partner	me
This moment unsettles me.					✓

Now tick each idea.

Who does it belong to?

Tick one box.

Idea	Alex	the teenagers	the film	my partner	me
Alex does not know the group's plan.	☐	☐	☐	☐	☐
Leah has a replacement piece.	☐	☐	☐	☐	☐
The film shows Alex first.	☐	☐	☐	☐	☐
My partner says: Alex still helps at the end.	☐	☐	☐	☐	☐

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

Tick grid 2. Check your ticks

✓ **Self-check**

My reaction belongs to me. Check your ticks.

Idea	Alex	the teenagers	the film	my partner	me
Alex does not know the group's plan.	✓				
Leah has a replacement piece.		✓			
The film shows Alex first.			✓		
My partner says: Alex still helps at the end.				✓	

Page 11. Build your argument

Read the model

> “At first, ‘Wait’ unsettles me.
>
> The film shows Alex before the whole table.
>
> So I understand the interruption only later.
>
> Alex still helps at the end.
>
> I think the scene values listening.
>
> I cannot claim to know Leah’s feelings.”

Route S. SEGPA

Say one line at a time:

> “At first…”
>
> “We see or hear…”
>
> “The film…, so…”
>
> “I think…, but…”

Read the limit.

You may record separate sentences.

Route C. CAP

Use the Route S structure.

Add:

> “I value… because…”

Then attempt:

> “If the film…, I might…”

Route P. Bac pro and CFA

Use the full model.

Explain one returned detail.

Add a conditional test.

Route G. Lycée général

Use the full structure.

Add:

- a competing reading;
- a qualification;
- a connection to the debate motion.

CFA students use the route appropriate to their qualification and current needs.

Page 12. Building your vocabulary

Exercise A. Match

◆ **Worked example:**

> “newcomer” means someone who has recently arrived.

Match:

Items	Definitions
1. agency	a. fail to notice
2. take over	b. the ability to act
3. overlook	c. assume control

► **Answers:**

1b, 2c, 3a.

Exercise B. Add a connector

◆ **Worked example:**

> “I expected a repair, but the group already had a plan.”

Choose “because”, “but” or “so”.

1. The wider shot comes later, _____ I see the plan later.
2. I change my reading _____ another detail matters.
3. Alex is central at first, _____ the teenagers also act.

► **Answers:**

1. so;
2. because;
3. but.

Exercise C. Complete the conditional

◆ **Worked example:**

> “If the film showed more, I might notice more.”

Choose:

1. If the film showed / will show the group first, I might respond differently.
2. If the music stopped, I might / will listen differently.

► **Answers:**

1. showed;
2. might.

Exercise D. Repair a claim

◆ **Worked example:**

Not:

> “They all agree.”

Better:

> “The silence does not prove agreement.”

Now repair:

> “I know exactly how the character feels.”

► **Possible answer:**

> “I can interpret the portrayal, but I cannot claim the character’s private experience.”

Page 13. Your independent 52-minute route

If you are working alone, pause whenever needed.

This is not a speed test.

Time	Task
0 to 4	Identify your source and read the goal.
4 to 10	Choose your entry and complete shock, surprise and liking.
10 to 18	Select one reaction and an observed detail.
18 to 24	Explain one film choice.
24 to 30	Complete language practice and check answers.
30 to 38	Test a formal change and answer the supplied challenge.
38 to 44	Say or record your argument.
44 to 49	Correct one weakness and keep the written record.
49 to 52	Note homework and make flashcards.

Stopping point: minute 44.

Eight-minute ending:

two minutes:	say a conclusion and a limit;
three minutes:	keep the written record;
two minutes:	note homework and make one card;
one minute:	correct a sentence.

Page 14. Check and improve

◆ **Worked example**

First version:

> “The camera is good.”

Missing:

> “A precise choice and its effect.”

Improved:

> “The wider shot reveals preparation I had not seen.”

Your self-correction grid

Criterion	What I missed	My improved version
My reaction	_____	_____
My observed detail	_____	_____
My film explanation	_____	_____
My response to another detail	_____	_____
My cultural-care limit	_____	_____
My vocabulary or syntax	_____	_____

Final check

☐ I named my source.

☐ I started with a personal response.

☐ I used a checkable detail.

☐ I explained one film choice.

☐ I considered another detail.

☐ I improved a sentence.

☐ I did not speak for a community.

© 2026 Madame Carole Paoli Pompougnac · CC BY-NC-SA 4.0

Written record

> My reaction starts the analysis.
>
> Evidence connects it to the film.
>
> Film choices influence what I notice.
>
> Another spectator can complicate my reading.
>
> I can make a claim and state its limits.

Homework

◆ **Worked example:**

> “If the wider shot came first, I might understand the interruption differently.”

Now:

1. Record your improved argument.
2. Use one film word.
3. Use one connector.
4. Attempt “If…, I might…”
5. State one limit.
6. Make two flashcards.

Supported route: about thirty seconds.

Extended route: forty-five to sixty seconds.

Blank flashcard
